

Paper review.

Hand out a file hw5.pdf with a thorough review of the paper

H. J. Boehm: Threads cannot be implemented as a library, Proceedings of the ACM SIGPLAN conference on Programming language design and implementation, 261—268, 2005.

<https://doi.org/10.1145/1065010.1065042>.

(also available at <https://courses.cs.washington.edu/courses/cse590p/05au/p261-boehm.pdf>).

a)—c) Focus on sections 4.1, 4.2, 4.3, each giving an argument supporting the claim in the paper's title. For each one, clearly state whether you agree with the argument (yes/no), explain why. Propose an appropriate solution (if it differs from the author's proposal) for each problem illustrated in code fragments throughout section 4.

d) Clearly state (yes/no) whether you would recommend the paper for publication as it is. Explain.
